THE STORAGE DESIGN Catalogue

Storage Design Limited
Primrose Hill
Cowbridge
South Wales
CF71 7DU

Our catalogue has a wide selection of products to meet the everyday requirements of the warehouse and workplace. Over 90% of our products come directly from UK manufacturers ensuring value for money, quality products, good availability and product that meet British Standards.

STORAGE DESIGN LIMITED is a business to business supplier of storage systems, materials handling equipment and associated products. We are often known as a storage system specialist.

The business has grown over 31 years, establishing a sound understanding of our clients' needs and requirements.

You should find we are very knowledgeable with respect to our products and we always like a challenge, so please give us a call.

Storage Design Limited is an 'independent distributor' therefore not tied to a single source which means we can direct our customers to the best possible solutions.

WAYS TO ORDER

ORDER ONLINE ANYTIME

Simply visit our website, where you will find our range of products to select from, available to order 24/7.

CALL US

Our experienced Customer Service Team are happy to assist you in any way – to provide further information, arrange a site visit or take your order over the phone.

STORAGE SOLUTIONS

FOR RETAIL

In the fast moving world of retail, flexibility is the key to keeping up with customer demand. We offer a wide range of shelving, racking, lockers, containers and other ancillary equipment for this sector; supporting the supply chain from, distribution centres, to outlet and e-fulfilment centres, to click and collect service points.

With a range of static and mobile racking and shelving systems available as single, multi-tier or mezzanine based solutions; our versatile range of products are as well suited to the department store or supermarket environment, as they are for the specialist retailer or online seller.

Providing secure personal storage lockers for a large retail workforce can take up a lot of valuable space (that could otherwise be used for holding stock). Understanding staff requirements, shift patterns etc., helps design the right solution using our range of lockers; improving user efficiency and welfare (whilst minimising space requirements).

We can offer a wide range of ancillary equipment that enhances retail environments, from cupboards for offices, to pallet rucks for stock movement.

Design & Installation

Sometimes you want a little more. We are happy to support you on larger projects where you are looking for a more tailored solution to meet your needs.

We have a dedicated and experienced team who will be happy to visit you and work along side you.

Contact us today

Shelving Systems

Adjustable shelving allows for shelves to be easily repositioned, in order to accommodate the changing profile of stock through the year.

See pages 26-41

Roll Cages

See page 151

Tiered shelving allows full utilisation of the available ceiling height, with greater storage capacity, which reduces frequent deliveries and increases sales area floor space.

Garment Hanging

Stockrax offers an economic and versatile solution to garment storage in Retail stockrooms. We can offer various solutions to match your requirements whether you wish to hang or flat pack your stock.

See page 35

Stack & Nest Containers

See pages 124-125

Vision Panel Lockers

Vision Panel lockers allows personal item inspections, without having to open the locker.

See page 78

Staff Lockers

From the back of store staff to Head Office; we have the right steel locker solution for your staff.

See pages 58-63

Workbenches

Stockrax workbenches offer flexible packing and merchandising work space.

See pages 129-133

Pallet Racking

Pallet racking is used throughout retail, from clothing and food distribution centres to cash & carry. We can design and supply a wide range of solutions to meet your needs.

See page 50-54

STORAGE SOLUTIONS

FOR HEALTHCARE

A mix of locker door configurations were used to create this hospital changing room. To help keep the facility tidy, sloping tops were fitted and to aid cleaning, the lockers sit on support frames.

Healthcare storage requirements are vast and complex. Each environment requires medical cabinets, storage for medical records and equipment, uniform storage and much more. Every hospital and medical department has its own unique requirements and challenges and that's why every storage solution needs to be tailored around these needs to achieve the best solution possible.

With the vast range of storage and industrial products in our catalogue we can help you throughout your facility. From medical

records to staff changing, from on-ward storage to pharmacy shelving, from linen and other hotel services to maintenance stores, we have a storage solution.

All of our lockers and shelving units are finished with a ActiveCoat antimicrobial powder coating. ActiveCoat technology minimises the risk of cross-contamination and reduces levels of bacteria on treated surfaces by 99.9% in just two hours.

Staff Lockers

See pages 58-63

Workwear lockers include additional internal configurations and door options to suit specific requirements, such as clean/dirty compartments and uniform hanging.

Picking Trolleys

See page 148

Picking Trolleys offer a safe way of accessing records and X-rays within a Hospitals medical record centre .

A range of cupboards and workstations which allow for the secure storage of vital first aid equipment around the workplace ensuring quick access to emergency supplies if an accident occurred.

Medical Cabinets

See page 95

Plastic Containers

Antibacterial clear Linbins are designed for specialist use in hygiene sensitive zones. The antibacterial additive minimises the spread of germs and diseases.

See page 106

Shelving Systems

Mobile shelving offers a high density solution to medical record storage. Large mobile shelving systems can be designed with multiple aisles, in order to allow multiple user access.

See pages 27-41

First Aid Kits

Range of first aid kits and equipment for use throughout the workplace.

See page 179

Stormor shelving is designed to maximise the available space within the hospital wards storage areas.

Our solutions store everything from catering equipment and non-medical supplies, from linen and other hotel services to maintenance stores.

Lidded boxes

Makes for easy and secure movement of records, medicines and other items around the hospital.

See pages 121-125

Pharmacies stock a wide variety of drugs and equipment, which need to be accessed quickly and easily.

Design & Installation

Sometimes you want a little more. We are happy to support you on larger projects where you are looking for a more tailored solution to meet your needs.

We have a dedicated and experienced team who will be happy to visit you and work along side you.

Contact us today

We have a range of static and mobile shelving CSSU storage options to meet your requirements.

STORAGE SOLUTIONS

FOR MANUFACTURING

Integrated storage solutions maximise the use of the available space, increases productivity and protects stock from accidental damage.

Euro Shelving

See page 32

From pallet racking systems for bulk storage, to shelving for lighter requirements, lockers for staff personal storage needs, workbenches for assembly, and drawer units for tool storage, we cater to every requirement faced in production environments.

Regardless of what you need to store, we can provide durable industrial shelving, racking and warehouse storage systems that save space, improve retrieval rates, allow for stock rotation, can be integrated with MRP stock control systems, and ultimately improve the overall efficiency of your operations.

Our additional range of ancillary equipment makes us a comprehensive one stop manufacturing industry supplier.

Workbenches

See pages 130-133

Choice of workbenches to enhance your production process

Workstations

See page 96-97

Workstations in various configurations for use as quality or information stations.

Fatigue Matting

See page 158

Range of industrial matting designed to help reduce the effects of fatigue on workers that have to stand to work.

Crew Lockers

See page 81

Crew extra wide locker for storing bulky work wear and personal clothing.

Ensures staff access shelving and racking safely, available in a range of styles and sizes.

Access Steps

See pages 139-143

Staff Lockers

See pages 58-63

Our lockers have an ActiveCoat anti-bacterial paint finish making them ideal for food production and processing facilities.

From rack to fire signs we have the solution to your sign and labelling needs..

Warehouse Labelling

See pages 163-170

Euro & Tote bins

See pages 120-125

Versatile plastic stacking container, for storage and product movement through to despatch.

Design & Installation

Sometimes you want a little more. We are happy to support you on larger projects where you are looking for a more tailored solution to meet your needs.

We have a dedicated and experienced team who will be happy to visit you and work along side you.

Contact us today

Pallet Racking is used throughout the manufacturing process. From carton live for component assembly, to narrow aisle racking with stillages off finished sub-assemblies or to specialised storage solutions for carpets - we can help and advise.

Pallet Racking

See pages 50-54

STORAGE SOLUTIONS

FOR EDUCATION

We have a wide range of products which can be used throughout educational facilities.

Our lockers are used across age groups, from Primary to Tertiary, all complemented by a range of seating & benching.

We can offer a wide range of shelving, cupboards & cabinets for administrative offices, Design & Technology departments, libraries and PE equipment storage.

Ancillary equipment includes plastic containers, safety signs and recycling bins.

Benching & Seating

See pages
70-73

Range of benching & Seating modules available in a range of sizes and colours. Benches are also available in 3 heights, infants, junior and senior.

Linbin Containers

See page
107

Neon colours brighten up as well as tidy the learning environment.

Office Shelving

See page
27

Ikon shelving has a white and stylish finish making it ideal for school offices. The wide range of accessories means it can offer flexible storage solutions.

Cupboards

See pages
88-95

The Janitorial cupboard is one of the many different styles of cupboards we offer.

Recycling Bins

See pages
174-175

These brightly coloured receptacles are available to complement schools, colleges and universities of every size, to suit all environments.

Our lockers are available in a range of heights and materials allowing them to be used from primary schools through to further education.

Lockers

See pages
58-69

FOR OFFICES

Visitor Lockers

See page 67

Satin finish MFC door lockers are popular where image and style are key, such as offices and reception areas.

Folding Trolley

See page 148

Steel trolley with folding handle, for easy storage. Ideal for moving office consumables around the workplace.

We have a number of office storage solutions that maximise the space available – while still looking attractive in the office environment and remaining cost effective.

With open plan workspaces, creating aesthetically pleasing storage is not always easy. For visitor and staff personal storage, our range of laminate and MDC lockers, offer a smart and robust solution, can complement hot desk policies and through their wide range of colour and finishes enhance any decor.

Mobile and static shelving is efficient, by improving house keeping of 'live' file storage. Mobile storage can also improve security as bays can be closed up and locked when not in use.

We also offer everything from cupboards for stationery, to janitorial storage, steps to trolleys, and signage to first aid kits.

Kick Steps

See page 139

Lightweight steel kick step is great for accessing higher and hard to reach areas making it ideal around commercial premises.

Mobile Shelving

See page 34

High density, aesthetically pleasing and space efficient storage solution for offices, as they represent a lower cost alternative to increasing floor space.

Cupboards

See page 88

Choice of cupboards available in a range of sizes with different internal configurations to meet all storage requirements.

STORAGE SOLUTIONS

FOR WAREHOUSING

Pallet Racking

See pages 50-54

From wide aisle to narrow aisle, we can fulfil your warehouse pallet racking needs. We can also help with Drive In, Pallet Live, Push Back and Carton Live requirements. **Contact us for further details**

Whether you need a few bays of pallet racking, through to a complete warehouse design and installation we can help. We have a range of pallet racking systems to meet the storage requirements that are unique to your business, whatever sector, size and application. We can integrate pallet racking with tiered shelving, carton live storage or mezzanine floors to create efficient, space optimised installations.

We also have a great range of lockers for use in warehouses. These are perfect for storing workwear, dispensing clean uniforms or overalls and general employee personal storage. Whether you need lockers on your warehouse floor or require an on-site changing room, we offer a range of styles, door colours and locking mechanisms to meet every need.

We can also supply packing benches, workstations, barrier protection, rack labelling, safety signs, narrow aisle platform steps and health and safety products.

Design & Installation

Sometimes you want a little more. We are happy to support you on larger projects where you are looking for a more tailored solution to meet your needs.

We have a dedicated and experienced team who will be happy to visit you and work along side you.

Contact us today

Medical Station

See page 96

First aid Workstations offer secure storage of vital first aid equipment around the workplace.

Range of different warehouse step designs in various heights offer easy access to items stored at height on racking or shelving.

Warehouse Steps

See pages 142-143

Warehouse Signs

See pages 169-170

From rack to fire signs we have the solution to your sign and labelling needs.

Workstations

With a compact design and higher work surface, these workstations enable employees to use them whilst standing.

See page 96-97

Staff Lockers

Changing rooms can be designed to incorporate various configurations of locker to accommodate varying needs. From wet and dry clothing for fork lift truck operators, to small personal items for office staff.

See pages 58-63

Spill Control

See pages 160-161

Accidents do happen. Our spill control management products provide effective solutions to protect against pollution and to tackle spill incidents.

Hand Pallet Trucks

See pages 149

Various models to help move palletised goods around the workplace.

Recycling Bins & Sacks

See page 175

Keep your warehouse tidy with our range of recycling bins & sacks.

Warehouse Shelving

Shelving systems improve order picking efficiency, ensuring products are easily accessible and organised. Our range includes adjustable shelving and Longspan systems.

See pages 32-41

STORAGE SOLUTIONS

FOR ARCHIVES, MUSEUMS & HERITAGE

Our shelving is used extensively within the Museums & Heritage sector, storing artefacts large and small. Stormor Double Skin shelving is ideal for use where shelving needs to conform to BS 4971:2017 Conservation and care of archive and library collections.

Shelving

See pages
28-41

The archives, museums and heritage sector is vast, encompassing everything from records storage, deeds, wills and legal document storage to artefacts and artwork storage. The range of different sized items that needs storing requires a functional, tailored, flexible archive storage solution. Our static and mobile shelving ranges, with their range of accessories ensures you receive the correct solution for your unique requirements.

For where there is public access our lockers will provide storage for visitors belongings.

Drawer units and workbenches are available to help in conservation workshops, steps help promote the correct health & safety practices and trolleys ensure easy movement of artefacts.

Pedestrian Barriers

See page
155

Retractable barriers allow you to manage your queuing space, or cordon off access to a restricted area.

Our range of small item lockers store phones, wallets, purses and keys, securely and safely. Ideal in environments where these items are not permitted or need to be left.

Small Item Lockers

See pages
75 & 77

Access Steps

See pages
141-143

Accessing artefacts or archive files from high shelving requires a stable platform. We offer a range of sizes and heights to suit your requirements.

Design & Installation

Sometimes you want a little more. We are happy to support you on larger projects where you are looking for a more tailored solution to meet your needs.

We have a dedicated and experienced team who will be happy to visit you and work along side you.

Contact us today

Mobile shelving systems maximises storage capacity, making them particularly effective for archives where documents have to be retained for long periods of time, in order to comply with legal requirements, but need infrequent access.

Mobile Shelving

See page
34

FOR ENGINEERING

Mobile Workbenches

Set up your work area where it is needed, quickly and efficiently. With a mix of drawers and cupboards these workbenches store all your tools and equipment securely.

See pages 135-136

Requirements for storing goods in warehouses, parts stores, assembly areas or production lines always remains the same; easy location and access to goods; efficient stock control; safe and secure storage for tools and equipment; ergonomically designed and practical packing and work stations.

Our range of trolleys and trucks help you with the efficient movement of goods around the workplace whilst our ladders and steps ensure safe access to out of reach items.

We can also help improve employee welfare by providing secure personal storage lockers and managing the issue of essential workwear through our garment dispenser lockers.

Pallet Racking

See pages 42-45

Pallet Racking is the ideal solution for bulk storing palletised components and materials, allowing access to all items stored.

Store valuable small items in workshops or maintenance stores with these Louvre panel cupboards.

Louvre Panel Cupboards

See pages 98-99

Euro Shelving

See page 32

Heavy duty Euro Shelving is a fully adjustable, robust shelving system. It can also be designed as a tiered shelving structure, helping to maximise the storage capacity of the available space.

Where tools and equipment need to be safely locked away when not in use, but easily accessible when required, drawer storage cabinets are the ideal solution

Tool Drawer Cabinets

See page 137

Mobile louvre panels with Linbins allow for the easy movement and efficient storage of small items.

Feeder Trolleys

SHELVING & RACKING

The plastic shelf slats are easy to remove for cleaning and are manufactured from bacteria and acid proof raw materials.

Shelf slats can be removed and cleaned in a dishwasher. Frames should be wiped clean with a dry cloth. If a damp clean is required, ensure the area is dried well. Do not use corrosive or abrasive cleaners on the frames.

SAFETY
It is essential that shelving exceeding a height to depth ratio of 4:1 to the top loaded shelf, is adequately secured to the floor. Bay codes followed with an * indicate floor fixings supplied.

COMMERCIAL SHELVING

STORMOR DOUBLE SKIN FRAME SHELVING

An economical and fully adjustable shelving system - ideal for general purpose applications. Designed for commercial and professional archiving applications it is aesthetically pleasing, with clear entry and concealed clips. The system satisfies the requirements of BS EN 16893 2018

- Choice of open back or back clad shelving bays
- Light Grey paint finish
- Supplied flat pack with 6 shelves for easy assembly
- Easily adjustable shelves on 25mm pitch
- All bays are 1000mm clear between uprights (1042mm overall) and come as KD kit complete with all necessary fixings and assembly instructions
- ActiveCoat microbial paint finish

Double skin uprights allows the full shelf width to be used, with clear unimpeded access, for easy insertion and removal of files or archive material.

Heavy duty, fully adjustable steel shelving system offers simple and fast assembly. Shelves are located on clips, which slot into the upright, creating an extremely rigid structure, in which shelves can be repositioned when required. With its modular design, you can extend the shelving system at any time, to meet your future storage requirements. Easy clip together assembly.

- Robust steel shelving, designed to suit any working environment
- Each bay comes with 6 steel shelves
- UDL Shelf loads 300, 400 and 450d mm shelves - 160kg. 600d mm shelf - 135kg
- Available as Open All Round or Fully Clad bays

EURO SHELVING EXTRA CROSS BRACING

Each brace assembly provides essential bracing for 12 bays of open shelving. Starter bays come complete with braces but extra braces are required if run exceeds 11 extension bays.

SHELVING & RACKING

INDUSTRIAL SHELVING

MOBILE SHELVING

Effective storage systems are designed to provide efficient storage and retrieval. That's why every mobile shelving system will give excellent accessibility, whilst maximising the use of floor space for storage.

Mobile shelving is effective in saving space, by eliminating the need for several access aisles. Because the shelving moves along floor tracks, the space for only one aisle is needed. When an item is required, the particular shelving bay is identified and an adjacent aisle is created, by moving the mobile shelving units apart. Mobile shelving is opened and closed by pull handles, or hand operated mechanical systems.

Roll-a-side mobile shelving is useful in small offices, or awkwardly shaped areas, such as corridors or alcoves. Shelving is mounted on low profile mobile bases and tracks and are simply rolled aside to reach the units behind.

SHELVING & RACKING

Mobile shelving increases the filing capacity to 192 linear metres. When a document is required, the particular shelving bay is identified and an adjacent aisle is created, by moving the mobile shelving units apart.

Alternatively, Mobile shelving can reduce the space required for storage. Up to 50% of the floor space can be released for other uses, when compared with filing cabinets and 38% more with static shelving.

Mobile racking is particularly effective in offices, archives, libraries or retail stock settings, as they represent a lower cost alternative to increasing floor space.

If you've got lots of items to store, be it bulk storage, large archives or stock, the heavy duty mobile shelving system can handle all that and more. This versatile system, ensures that any space is fully utilised, allowing you to store more than you ever thought possible.

Mobile carriages end panels can be tailored to suit the aesthetics of your installation. Limited only by imagination, these optional end panels can be created to complement the decor of it's environment.

GARMENT HANGING SOLUTIONS

STOCKRAX GARMENT HANGING

Simple beam and upright storage systems are ideal for retail, stockrooms, laundry operations and workplace clothing storage

- Choice of double sided or single sided wall perimeter rails
- Rails are easily adjusted to accommodate changing stock requirements
- An optional shelf is available for double sided bays to provide further flexibility

INDUSTRIAL SHELVING

LONGSPAN SHELVING

Link51 Longspan is a hand loaded, widespan, heavy duty shelving system, that comes in graphite grey uprights and grey beams. It is used to store bulky or long items of up to 780kg per shelf level. Longspan has chipboard or galvanised steel panels and is therefore the ideal system for storing boxes, clothes, loose items, and much more. By using starter and extension bays, it is easy to create long runs in any warehouse environment.

- Unrestricted shelf levels allow for easy access
- Easy to install and adjust
- Bays are 1800mm and 2100mm high, supplied with 3 shelf levels
- Graphite grey steel uprights with galvatite braces and light grey beams
- Contains 2 frames (1 in an extension bay), feet, 3 pairs of beams, locking clips, decking material and where applicable wire beam ties

SHELVING & RACKING

EASY ORDERING

Longspan Shelving Starter and Extension bays make ordering easy. To create a run, just order a Starter Bay and the correct number of Extension Bays

Starter bays can be built as stand alone bays

Bolt free construction for simple, rapid assembly

STARTER BAYS FROM ONLY **£247.37**

QUICK & EASY ASSEMBLY

Unpack and assemble the framework by simply tapping together with a mallet. Once the framework is complete, just drop the shelves into position.

SAFETY

It is essential that shelving exceeding a height to depth ratio of 4:1 to the top loaded shelf, is adequately secured to the floor. Bay codes followed with an * indicate floor fixings supplied.

INDUSTRIAL SHELVING

APEX LONGSPAN 200 SERIES

SHELVING & RACKING

Longspan 200 is a stockroom shelving system with chipboard decking. Easy boltless assembly, makes it quick to build. Supplied with pre-assembled rivetted end frames, with three storage levels, comprised of stepped beams with 25mm thick chipboard decking.

- Light grey uprights, galvanised bracing and galvanised beams.
- The kits listed below are designed for a 1600kg maximum bay load.
- Each storage level carries a maximum 200kg universally distributed load.
- First beam level must not be greater than 1000mm from the floor.
- Longspan 200 series shelving must be assembled with a minimum of two bays in a run.
- We recommend that all frames are bolted to the floor, with one floor fixing bolt per baseplate. (order BLTBFF1035ZP)

Galvanised beams with painted frames

APEX COMPONENTS

DESIGN LONGSPAN SHELVING TO MEET YOUR EXACT STORAGE NEEDS.

Choose from a range of frame and beam sizes, to create a run of shelving that suits your storage requirements. Complete the bays with a choice of either chipboard or galvanised steel shelving panels.

STEP 1. To start specifying, create a single shelving bay with two frames and two or more beam levels.

STEP 2. To create a run of continuous shelving, add additional shelves and frames as required.

STEP 3. Then order your choice of decking to match your chosen number of beam level

Can be built as stand alone bays

Need help in specifying?
Call us for advice

FRAMES FROM ONLY £45.82

 Bay loads are dependant on beams used

APEX

APEX LONGSPAN FRAMES

Standard frame in different heights and depths. Simply order two for the first bay, then one for each extension bay. Bay loads are dependant on beams used. See Longspan 200, 500 & 750 series pages for basic frame loadings, or call for details.

• Light Grey finish

SAFETY

It is essential that pallet racking exceeding a height to depth ratio of 4:1 to the top loaded shelf is adequately secured to the floor.

FROM ONLY £142.27

LINK51 GALVANISED STEEL DECKING

Galvanised steel decking, spans pallet beams to provide a smooth deck. 2000kg UDL per level.

Code	Width	Depth	Each
PSL2290	2250	900	£223.29
PSL2790	2700	900	£142.27
PSL2211	2250	1100	£260.03
PSL2711	2700	1100	£216.29

FROM ONLY £70.40

LINK51 COIL CRADLES

Spans beams to provide location and support for coiled materials. Cradle carries 707kg UDL.

Code	Description	Each
CC0900GU	To suit 900mm deep frame	£70.40
CC1100GU	To suit 1100mm deep frame	£82.35

FROM ONLY £22.46

LINK51 FORK SPACERS

Used in pairs across beams, to provide 105mm high fork entry space. 2000kg UDL per pair.

Code	Description	Each
FS0900MOR	To suit 900mm deep frame	£22.46
FS1100MOR	To suit 1100mm deep frame	£26.83

LINK51 RACK PROTECTION

LINK51 RACK END PROTECTION KITS

Modular barrier system for protection against forklift truck damage

- Kits contain two protectors, a sigma rail and all fixings

PALLET RACKING

APEX PALLET RACKING

Designed for strength and durability. Supplied as an easy to assemble bolted end frames, with beams that locate in to the uprights. The beams are retained in place by the red and blue Apex Plastic Beam Lock. If Plastic Beam Locks are missing or broken on site, these provide a visible indication if a beam has been accidentally dislodged

- Light grey uprights, galvanised bracing and orange beams
- Each Bay will accept a maximum load of 8000kg UDL. First beam level must be a maximum of 1650mm from the floor
- Additional heights and capacities available on request

SHELVING & RACKING

STORAGE RACKS

CANTILEVER RACKING

Manufactured in the UK, the kits offer a cost effective and safe solution for storing long and heavy products, with the opening-fronted system, allowing for the storage of infinite and varying length items. The racking is available in light, medium and heavy duty.

- Single or double sided racking
- Adjustable arm heights - standard adjustment pitch 150mm
- Comes with black uprights and yellow arms as standard

VCHP10	Heavy Duty	£12.59

SHELVING & RACKING

CRADLES & RACKS

Keep your workplace organised and efficient with these bar cradles, sheet and board racks.

- Vertical storage racks and stacking bar cradles offer easy storing of materials, such as bar, tube, angles and flats
- Cradles can be stacked up to 5 units high and carry 1000kg
- Multi-purpose and plate racks are used to store plywood, chipboard, timber, steel or just about any other sheet format material on their edge.
- These versatile storage racks are ideal, for either in trade or retail outlets, or in warehouses where board or sheet material is stored.

VERTICAL STORAGE RACKS

Fully welded steel construction with steel base.

- 600 x 250mm storage bays
- Pre-drilled for floor fixing
- Blue epoxy finish

Code	Height	Width	Depth	Weight	Each
VVSR4	1500mm	1200mm	600mm	84kg	£297.24

SHELVING & RACKING

SHELVING SOLUTIONS

SHELVING DESIGN TIPS

Cross aisles help cut down journey times in picking operations, which helps increase efficiency and keeps fire escape routes clear.

Understanding our client's storage requirements, is vital in offering value for money, as well as the most practical and beneficial products possible. Whether the need is for high density storage of industrial items, maximising retail stockroom capacity, designing usable library schemes or managing records storage in an office – we can help you achieve a cost efficient and practical storage solution.

Determining the shelving you need, starts by fully understanding your stock profile. This is essential in ensuring the storage solution is designed to suit the size of the stored items. Often there are large areas of wasted space, where existing racking or shelving has been supplied, to suit the largest item stored, even though the majority of items may actually be smaller than this. Having bays of different shelf depths to match the stock dimensions, should be considered to maximise available space.

Specifying the correct shelf size is important, as it ensures that the whole width and depth of the shelf is used. Different bay widths can be specified, ensuring multiples of different sized items can be stored within the run. For example, by measuring the stock size, it is easy to choose the correct size of shelf, to suit multiples of the stock; e.g. women's shoe boxes are typically around 200mm wide and 6 boxes would sit perfectly on a 1220mm wide shelf, but men's shoes boxes are 255mm, so a 1100mm wide shelf is more applicable.

USEFUL SHELVING TERMINOLOGY

1. BAY - Module between a pair of frames.
2. RUN - A series of shelving bays connected length-ways.
3. SINGLE SIDED RUN - A Single depth of shelving.
4. DOUBLE SIDED RUN - Two runs built back to back, not necessarily of the same depth, but sharing a common 'spine'.
5. LEVELS - The number of storage levels in the shelving height.
6. AISLE - Space giving access to the picking or loading faces of shelving.
7. GANGWAY - Space for movement of transport but not giving access to picking or loading faces.

Providing maximum storage capacity is not the only criteria to be considered. How users access the shelving, needs to be considered. There is no point having the capacity if you can't easily use it. Narrow aisle widths will restrict the numbers of users who can work at the same times, so sufficient working space should be allowed for equipment to be used, such as pallet trucks and stepladders, valuable space can be utilised.

Once you understand your bay profiles, you can start to plan how to use them within the space available. You will need to take into account the position of doorways, windows, fire exits etc. along with ensuring adequate lighting along aisles. In long runs of shelving, cross aisles should be allowed to allow users to quickly move between runs, without having to walk to the end of aisles.

Using all of the available height, is a simple way to add significantly more usable storage area, easily and economically, within the same footprint area. This might be restricted by the weight of the items being stored and the implications of manual handling regulations, but by using manual and mechanical access equipment, this valuable space can be utilised.

We have a wealth of experience and knowledge in storage design and are conversant with the relevant Health & Safety and industry standards. You can be assured that our solution to your storage requirements, no matter how large or small, will always receive an unbiased view of how to provide you with a system, that serves your organisation in a financially and environmentally responsible manner, well into the future.

Mechanical access equipment allows for higher shelving to be considered, utilising the full building height.

PALLET RACKING DESIGN TIPS

We can offer bespoke design, installation and project management of any racking project.

The need to invest in pallet racking is often a straightforward requirement. However, different types of pallet racking can have vastly different outcomes, in terms of efficiency and cost, be it for standard conventional racking, drive in, pallet live, push back or very narrow aisle.

1. Some general considerations

- Make sure the pallets are suitable for use in pallet racking. The weight on the pallet is evenly spread over the full area of the pallet.
- Confirm the size of the load you are storing and consider any overhang.

- Understand the depth, width and height of the load including the pallet.

2. Simple calculations for pallet storage

FRAMES

- The frame height
- Allow 300mm at each storage level, for clearance to place and remove the load and the height of beam.
- The frame height = (load height + 300mm) x number of levels stored on beams + 600mm.
- Remember to consider any lighting or sprinklers at roof level, that may require additional clearance.
- The frame depth.
- Depth of the pallet minus 100mm. This will ensure that the corner blocks of the pallet, will be supported on the beams.

Increasing the vertical spacing of the beams, will reduce the maximum weight that a frame can safely support.

BEAMS

- The beam length.
- Assuming 2 loads per beam = 2 x load width + 300mm.
- Loads on beams to be uniformly distributed – do not exceed the beam capacity.

AISLES

- The aisle width depends on the mechanical handling equipment being used and the size of the load. The supplier of the equipment will provide recommended widths.

TYPICAL AISLE WIDTHS

- Counter balance fork lift trucks, lifting to about 5m, aisle width 4m.
- Reach trucks or stackers lifting to about 8m, aisle width 3m.

No matter how carefully you use your storage scheme, damage will occur from time to time, which can result in serious consequences, including injury to staff, if left undetected. We have a skilled team of safety engineers who are on hand to provide SEMA approved pallet racking inspections, to determine the safety and structural integrity of your pallet racking systems.

As pallet racking suppliers, with SEMA Approved Racking Inspectors (SARI), we are perfectly positioned to report on the status of your installation, regardless of the original supplier.

We provide you with a full report, detailing any damage and grade it using a simple red, amber, green system to signify severity. We will also offer a quotation for repairing any outstanding damage and outline ways to avoid similar issues occurring in the future, including introducing you to our range of Pallet Racking Accessories and Protection products, such as barriers, upright protectors, rails, signage and floor markings.

Racking Inspections

SEMA guidelines suggest you should have at least one pallet racking inspection from an expert every 12 months, but you should also run regular checks yourself on a weekly or monthly basis.

By carrying out these inspections and identifying any safety issues, you can also reduce lifetime costs associated with general pallet racking maintenance.

- Meet your legal requirements under Health and Safety Regulations.
- Help reduce insurance premiums and maintenance costs.
- Avoid accidents and consequences of failing to comply with HSE.

Whether you're unsure about the structural integrity of your existing pallet racking system, or simply want to keep up to date with best practices for a safe working environment, call us today.

WAREHOUSE SOLUTIONS

WIDE AISLE PALLET RACKING

Easily installed, cost effective and versatile, adjustable beam racking is the most widely used pallet storage system and allows 100% direct access to each pallet stored.

With adjustable beams, racking can be re-configured to accommodate changes in the type of goods stored, and wide aisles allow access by all types of trucks, making specialised handling equipment unnecessary.

Racking arranged in this way gives high quality storage, but may only utilise 40% of the available floor space, the rest being aisles.

SHELVING & RACKING

Cross aisles allows workers to move quickly between picking aisles. These can be increased in height to accommodate fork lift truck movement.

Wide aisle pallet racking allows for easy access to every pallet stored and can accommodate manual picking, as well as bulk operations.

Need advice or information?

Give us a call

Wide aisle pallet racking has a minimum aisle width of 3 metres, allowing for standard fork lift trucks to be used.

NARROW AISLE PALLET RACKING

SHELVING &
RACKING

Pick and Deposit (P&D) stations can be used at the end of racks, to assist in load handling between fixed aisle and other trucks.

By allowing fork lift trucks to operate in aisles, of up to half the width required in conventional adjustable beam pallet racking, Narrow Aisle and Very Narrow Aisle racking, makes excellent use of floor space and maximizes the height at which goods can be stacked.

Using specialised lift trucks in either 'man-down' or 'man-up' variants, narrow aisle racking is designed for safe, efficient load handling, within the tight confines of these efficient aisles.

Narrow aisle pallet racking requires specialist trucks to operate in the aisles. The height of the installation will have a major bearing on the truck type.

WAREHOUSE SOLUTIONS

DRIVE IN PALLET RACKING

Using minimal space for access aisles and lanes, Drive-in racking provides a high-density and very space-efficient bulk storage system.

With the first pallet into a lane being the last out, stock selectivity is restricted, but when loads are delivered and dispatched in batches, this is not a difficulty.

Pallets are stored on runners, in the depth of the racking and trucks enter to deposit or retrieve.

The system lends itself to high volume movement, of low value products, where handling costs are a large percentage of the overall product cost.

Used extensively by drink manufacturers, as a safe way of block stacking glass and PET bottles..

With limited stock rotation, Drive-in pallet racking is particularly suitable for seasonal goods.

Pallets are stacked by the first-in, last-out (FILO) principle, which means that individual pallets cannot be accessed directly, but one by one from the front face of the rack.

SHELVING & RACKING

SHUTTLE PALLET RACKING

Shuttle storage is an alternative to Drive-In, Push Back or Pallet Live racking systems. These systems, though efficient, are limited by the length of the storage lane that can be practically achieved.

The shuttle storage system overcomes this, by storing pallets within a system that can operate to greater depths. The racking features guide/support rails which run the depth of the rack structure, on which an automated shuttle travels.

Pallets are loaded onto a shuttle at the front of the lane, which transports the pallet down to the other end.

The in-built sensors on the shuttle detect the position of previous pallets and places the new load at a predetermined distance from them, before returning to the start face.

The shuttle is easily moved between lanes by a standard fork lift truck.

Shuttles are fitted with a 48V lithium no 'memory effect' battery, offering up to a 15 hour operating time.

The shuttle movements are sent via the radio remote controller, allowing the forklift truck and driver to be released to other tasks while the shuttle operates.

The length of the storage lane is not limited in the same way as a pallet live system, with no incline required.

PUSH BACK PALLET RACKING

Effectively utilising floor and cubic space, Push-back racking is amongst the most space and time-efficient pallet storage systems available.

The pallets are loaded and unloaded from the same aisle, reducing truck travel distances and improving efficiency.

Pallets are loaded in sequence onto roller beds, or wheeled carriers of differing heights and are pushed back along inclines to utilise the full depth of the racking. Pallets can be stored up to ten deep and when a load is retrieved the remaining pallets roll forward into position at the picking face.

Selectivity is 'first-in, last-out' and with each product having a dedicated lane, dynamic Push-back racking is particularly useful in marshalling areas and for bulk storage and handling.

Push-back racking allows for the storage of up to 10 pallets deep.

Pallets are loaded onto wheeled carts or rollers, and are pushed back along inclined beds. When a load is retrieved, the remaining pallets roll forward into position at the picking face.

When fully utilised, very high occupancy rates can be achieved.

RACKING

PALLET LIVE PALLET RACKING

Pallets are loaded onto dedicated lanes of inclined gravity rollers which are set at a fixed gradient. When a load is taken from the picking face, the next pallet rolls onto position, with replenishment stock loaded at the opposite upper end of the lane.

Working on a first in, first out basis, dynamic live storage racking provides extremely high levels of density in a given area, and provides automatic stock rotation, with the minimum of fork lift truck movements required to handle the flow of goods.

Pallet live can be used to feed multi level picking operations, where pallets are broken down for picking.

Ideal for perishable and time sensitive products, pallet live storage saves space of up to 60% compared to conventional racking.

WAREHOUSE SOLUTIONS

PICK TOWERS

A pick tower is a multi-level high density storage and picking solution, designed to maximise the available height of the building.

Compared to traditional low level storage and picking systems, it provides increased capacity within a similar foot print. It also provides commercial benefits compared to multi-level mezzanine floor solutions, which may require additional civils or building work to support the mezzanine structure.

A number of pick tower options are available to suit your product range, SKU numbers and picking profile including:

- Individual items – single SKUs
- Full cartons – not broken down
- Pallets
- A combination of all the above

Pick tower designs range from a simple ground plus 1 solution up to ground plus 4 levels, utilising approximately 14 metres of head room.

Up to ground plus 4 floor levels are achievable, delivering great space utilisation and flexibility.

The mezzanine floor integrates with the pallet racking pick tower to create a working area for the conveyors.

Pick towers can have live storage and garment hanging integrated within the structure, making it a favourite of fashion retail distributors.

MEZZANINE FLOORS

The wide range of sizes, floor types, accessories and construction materials mean the mezzanine can be designed to meet your exact requirements.

A mezzanine floor is basically a raised structural steel platform independent of your main building structure, supported by steel columns. It creates invaluable extra floor area from wasted air space above your existing work and storage areas, economically increasing the amount of space available to you.

Mezzanine floors enable the working height of a building to be utilised to its full potential, by doubling or tripling the floor area

They can be designed to accommodate:

- Offices • Production equipment
- Storage areas • Retail sales space

Mezzanines can be designed to accommodate a further floor at a later date, future proofing the installation against planned growth.

Lighting, sprinklers and fire cladding can all be managed and installed alongside the mezzanine floor.

Mezzanines can also be used in front of house retail operations to increase the sales area.

LINK51 STEEL LOCKERS

Quantity Discounts

Link51 steel lockers are available in a wide range of sizes, door configurations, locking options, colours and finishes. The metal locker range consists of full height metal lockers, primary school lockers, cube lockers, small item lockers, laptop lockers, police lockers, staff lockers and garment lockers. Fast delivery on popular sizes means that some sizes and colours are available within 5 days.

Link 51 standard duty lockers have been tested and conform to the requirements of the British Standard for Clothes Lockers BS 4680: 1996 'Standard Duty'.

High gloss, powder coated paint finish

LOCKERS

LINK51

- Riveted and welded steel construction
- Durable epoxy powder coated finish
- Single door lockers fitted with hat shelf and double coat hook
- Hanging rail in addition to coat hook fitted as standard on 450mm deep 1 and 2 door lockers

- Door stiffeners provide added strength and security
- 8 & 10 door lockers available. Contact us for details
- Other sizes available upon request

INTEGRAL SECURITY

The design of the intermediate shelf prevents access to compartments above and below an open door. Shelves have an extended lip to provide a division between doors, offering protection against doors being prised open.

1 door

Air vents as standard on standard lockers

Hinges are welded to the door and riveted to the frame to give added strength and allow for easy replacement of damaged doors

Rail in addition to coat hook fitted as standard on 450mm deep 1 and 2 door lockers

Lockers are fitted with a camlock as standard. Supplied with 2 keys. A master key is available.

A hasp & staple padlock fitting (padlock not included) can be fitted as an alternative to a camlock at no extra cost.

Please replace 00 with 11 if hasp & staple lock is required at time of order.

For padlock specification see page 82.

EVERYDAY LOCKERS

PROBE STEEL LOCKERS

Probe Lockers have an excellent reputation for build quality, style, security and durability. Manufactured in the UK since 1960. Their range includes lockers for leisure centres, wet areas, uniform lockers, clean and dirty lockers and more. These are the ONLY lockers in the UK that are Fire Rated Lockers - they comply with the European Standard - EN 13501-1: 2007 +A1: 2009 relating to fire performance. This means that these lockers will not combust, increase or sustain any fire within their proximity.

Probe Lockers are designed and manufactured in the UK, conforming to BS 4680:1996 "Standard Duty" (excluding size specification).

LOCKERS

PREMIUM steel lockers

PROBE

Air-vent system on each door

Welded compartment dividers provide added rigidity

Quantity Discounts

Lockers are supplied with a micro sprung 10 disc camlock featuring 3000 serial combinations as standard.

Supplied with 2 keys. A master key is available.

EVERYDAY LOCKERS

PROBE LOCKERS IN AUTUMN COLOURS

These great new colours have been introduced to give you even more choice! There are five fresh door colours to choose from and the choice of white, black or silver body colours. These lockers have all the same quality features as the existing Probe range so you can be sure of a long lasting storage solution. These are the ONLY lockers in the UK that are Fire Rated Lockers - they comply with the European Standard - EN 13501-1: 2007 +A1: 2009 relating to fire performance. This means that these lockers will not combust, increase or sustain any fire within their proximity.

Single 8 door unit

LOCKERS

EVERYDAY LOCKERS

PLASTIC LOCKERS

Very tough and favoured for outside storage. Often educational environments will use the half size locker and place a colourful wall of lockers on outdoor corridors, so bags and books are quickly retrieved by pupils as they move to different classrooms. Also found in swimming pool areas where rust resistance is a key requirement.

LOCKERS

FULL HEIGHT PLASTIC LOCKERS

A robust and rust proof polyethylene locker that makes it highly vandal resistant and ideal for wet area changing rooms and outdoor storage. Lockers come with drain holes for cleaning.

CLOAKROOM EQUIPMENT

BENCHES

Made in the UK, this modern range of cloakroom equipment available in Light Ash or Black Polymer.

Easy to install, the range includes single and double sided benches, hook benches, wall mounted benches and wall mounted shelf and rails all with a host of options and accessories, including show baskets, ensuring you will find exactly what you are looking for. If you want further advice or different colour options simply phone and we will be happy to discuss this with you.

All cloakroom units have robust frames constructed from 50mm round, thick walled tubing with welded joints for increased strength and durability. They have anti-bacterial powder coating as standard.

Designed and developed for any environment

CHARGING LOCKERS

The In Charge™ Locker range, provides a safe environment for tool batteries, mobile phones, tablets and other electronic devices.

With trailing cables, the risk of theft and health and safety issues, finding access to safe and protected power points is a common problem in today's workplace.

In Charge™ Lockers are specifically designed to help overcome this and provide a secure, easy and safe solution.

Lockers are fully portable as a single unit - simply place the unit in a convenient location, plug the unit into a power point and the lockers are ready for use.

Simply plug in and start using

Charging
AC+IVE COAL™

Available With Sloping Tops

All In Charge lockers can be specified with sloping tops which are a great way of keeping locker areas tidy and more hygienic as they discourage users from leaving items on top of lockers.

LOCKERS

SMALL ITEM LOCKERS

Ideal for locations where items may need to be left or are not permitted.

SMALL ITEM LOCKERS

Lockers provide secure storage for small but valuable items in public areas and throughout the working environment.

- All units are supplied with a standard camlock and are available with either solid or perforated doors and with or without sloping tops
- The locker units can be hung on walls or bolted one on top of the other and side by side to form banks of lockers
- Personal item lockers can be supplied in singles or nests of two

SPECIALIST LOCKERS

VISION & PERFORATED DOOR LOCKERS

As the name suggests, Vision panel lockers allow for the inspection of stored items whilst providing a secure storage solution.

The lockers incorporate a toughened polycarbonate viewing panel set within a steel door with an all-round strengthened edge, allowing inspection of each locker compartment. This prevents lockers being used as a hiding place for stolen items and for high security or public spaces ensures locker contents can be viewed at all times.

Perforated panels on lockers are particularly useful when damp clothes or odours pose a problem – in settings where uniforms must be stored or personal items such as boots, bike helmets and school PE clothing.

Allows visual inspection of locker contents

SPACE SAVING LOCKERS

Space saving lockers are perfect for various locations, including warehouses and schools.

POD lockers have a unique space saving design can reduce floor space use by 70%.

Slimline lockers are an efficient way of saving floor space whilst maximising height.

Remember often two or three people can utilise the same locker at different times of the day.

If there is not a lot to be stored you can always use half height lockers to double up capacity.

LOCKERS

PADLOCK SPECIFICATION

We recommend the use of padlocks with the following dimensions:

	Minimum	Maximum
Shackle Diameter (A)	6mm	7.5mm
Top Dimension (B)	19mm	25mm
Shackle Internal (C)	19mm	25mm

LOCKER LOCK OPTIONS

PROBE

When considering a lock type, you'll need to consider security, convenience, on-site management and ultimately what is best for your environment. Our range of optional locks will cover all requirements. Ring us for details and pricing.

A COIN/TOKEN RETURN LOCK

Ideal when lockers have 'shared' users. The key is released when coin (£/€) or token is inserted. Key is captive again when the door is reopened and the coin/token is returned to the user.

B COIN/TOKEN RETAIN LOCK

Generates revenue from 'shared' user lockers. The key is released when coin (£/€) or token is inserted. Key is captive again when the door is reopened. Coin/token is retained in the box.

C COMBINATION LOCK

The 4 digit code combination lock has 10,000 possible combinations, making losing keys a thing of the past. Suitable for multi user applications. Master override key sold separately.

D DIGITAL COMBINATION LOCK

Simple to use, battery operated keyless lock with a choice of single or multi-user operation. Master override key supplied separately.

E FOUR TUMBLER COMBINATION LOCK

Ideal for facilities where keys are not desirable. The lock can be reset whenever it is open. This allows the locker to be used by several people at different times throughout.

F TRANSPONDER LOCK

A keyless locking system where the user bracelet is paired to an electronic lock. If the bracelet is lost, a new one is easily reprogrammed. This solution is perfect for gyms, sport centres and many other leisure facilities.

LINK51

LOCKER ROOM DESIGN TIPS

FEATURES OF THE LOCKER ROOM

The size, location, fixtures & fittings of the area or room designated for the lockers will affect the positioning and layout of the lockers. Take into account the following:

- Is the room or area large enough to accommodate the number (and size) of lockers required, whilst still leaving enough space for users to have easy access?

Note: ensure that the space is not confined, making the lockers awkward or uncomfortable to use, and the room potentially hazardous in an emergency evacuation situation (in response to a fire alarm, for example).

- Is the room or area accessible to groups of people who may all arrive at one time? Are any adjacent corridors, stairs or lifts easy to get to and move through? Is the room readily accessible for delivery and installation of the lockers?

- Take into account the position of doors and windows and their effect on the locker layout.

Note: the position of fixtures and fittings which could either obstruct the lockers or be obstructed by them. For example: ceiling pillars, low ceilings, alcoves, beams, skirting boards, radiators & heating pipes, light switches, sockets and other power outlets, lighting fixtures, ventilators and air-conditioning units, any access to service points.

- Check the condition of the floor - What is it made of? Is the surface suitable and in good condition? Is it level: lockers should always be located on a level, even floor. If there is significant slope, consider locating the lockers on support frames with adjustable feet.

- How are the floors cleaned? Even in a generally 'dry' changing area, the floor may be washed or mopped down from time to time. Where floors may be left damp for some time and on a regular basis, consider raising the lockers from the floor on a support frame which has a protective finish against corrosion.
- Assess the lighting - ill-lit locker rooms can appear oppressive and unwelcoming. Carefully assess the positioning of lockers and their effect on lighting - avoid creating areas of dark or shadow in the room, particularly in corners. If there is natural light, make the best use of it.

How is the artificial light provided? Will it conflict with the locker layout? If so, can the lighting be altered or the locker layout changed?

LOCKERS

LOCKER RUN SPACING

Lockers standing on the floor should be positioned so that there is a clear space or aisle at least 900mm wide - but preferably 1000mm - between the locker fronts and the opposing fixture - this could be a parallel run of lockers, or a corridor wall. Always allow clearance for wide-open doors - this varies according to the locker width.

Where space is available, the width of the aisle can be increased up to 1500mm where facing lockers are likely to be used simultaneously.

Lockers standing on support frames fitted with a seat should have a minimum aisle width of 900-1000mm between seats, but a spacing of 1200mm is desirable if facing lockers are to be used simultaneously.

Where the siting of lockers against a wall is impeded by the presence of skirting boards, floor coving or central heating pipes, stands can be used to raise the lockers clear of the obstruction. The rear leg of the stand can be inset to avoid the obstruction

OVERALL DIMENSION

When planning a locker room layout, allowance should also be made for the incremental increase in the overall length of locker runs, where nested units are butted together. 2mm is added to the overall length at each point where two nested units join together (refer to example illustrated, below).

EVERYDAY CUPBOARDS

STANDARD CUPBOARDS

We have an extensive collection of storage cupboards suitable for a range of commercial, office and industrial environments.

These cupboards come in a range of heights and widths, duties and materials. Choose from steel, plastic or stainless steel with free standing, mobile or wall mounted options.

As well as standard everyday cupboards for the office we also offer cupboards designed to meet specific storage requirements.

These include hazardous substances, COSHH, acid & alkali, PPE and medical cupboards.

In the automotive industry where small parts are valuable, our range of cupboards with Linbins or Lintrays provide a secure and clean environment in the workshop, warehouse, storeroom or office. These are complimented by our range of tool cupboards and drawer units for secure storage of tools and equipment.

Workstations offer secure storage along with a sloping worktop which gives a higher work surface, enabling employees to use them comfortably whilst standing. The range also includes computer, quality and information workstations for use throughout the workplace.

LINK51

Supplied with three high visibility labels. Simply choose the right label for the type of substance being stored:

- Harmful materials.
- Highly flammable.
- Corrosive materials.

Flush fitting handle for easier operation; eliminates risk of snagging when handling potentially hazardous substances. Door can be closed without the key being inserted on all 790mm plus units.

Adjustable shelves to maximise space for stored material

VISION PANEL CUPBOARDS

Cupboards provide visible but secure storage suitable for most working environments to store tools, computer peripherals, electronic components and high value items.

Based on the standard all-steel cupboards, with the addition of toughened polycarbonate view panels set within a steel door which has an all-round strengthened edge.

- Semi-concealed hinges
- Magnetic door catches
- High quality lock operating 3-point locking bars
- Shelves supported on clips, height adjustable on 25mm increments

ENGINEER CABINETS

SECURITY & KEY CABINETS

If you're looking for a safe secure cabinet, chances are you have cash or valuables that you're looking to keep out of the hands of the opportunist thief. The cupboards below meet European Standards EN-14450 with a cash rating of £2k.

Key cabinets are useful both in the workplace and at home. The Key Access Unit is ideal for sharing keys e.g. sheds, holiday homes, care-worker access and are installed in a discreet location.

LINBINS™

ANTI-BACTERIAL CLEAR LINBINS

Our antibacterial clear LINBINS are designed for specialist use in hygiene sensitive zones. The antibacterial additive minimises the spread of germs and diseases.

Made from the same quality materials and with the same capacities as our classic LINBINS, you are assured of a tough, durable storage solution.

- A favourite in schools, hospitals, and surgeries
- Also popular with mobile health units and ambulances
- Often used in kitchens and areas where food is present
- Often sold with shelving and cupboards, which also has been coated with antibacterial additive

Ideal for environments where hygiene is paramount

PERFECT FOR:

- ✓ HOSPITALS
- ✓ DENTISTS
- ✓ AMBULANCE UNITS
- ✓ MOBILE MEDICAL CENTRES
- ✓ SMALL STOCK ROOMS

LINBIN & LOUVRE PANEL KITS

Make the most of your wall space. Design an ergonomic solution. Wall mounted louvre panels provide a valuable and versatile storage unit for the home and the workplace. Panels are made from pressed steel and finished in grey epoxy powder coating as standard.

- Available in three sizes: Small (450mm), Medium (900mm), Large (1400mm)
- Bins available in Blue, Red, Grey and Black

Make the most of your available wall space - putting your small parts tidily where you need them

SMALL

Code	No. of Linbins	In Sizes	Colour	Height	Width	Each
VWPKA--	16	2		450mm	500mm	£34.57
VWPKB--	16	3		450mm	500mm	£40.34

Please add suffix when ordering: Red (RD), Blue (BL), Black (BLK) or Grey (GR)

MEDIUM

Code	No. of Linbins	In Sizes	Colour	Height	Width	Each
VWPKC--	25	4, 2		900mm	500mm	£70.49
VWPKD--	25	5, 3		900mm	500mm	£87.46

Please add suffix when ordering: Blue (BL), Black (BLK), Grey (GR) or Red-Blue (COL)

LARGE

Code	No. of Linbins	In Sizes	Colour	Height	Width	Each
VWPK E--	27	4, 5		1400mm	500mm	£124.16

Please add suffix when ordering: Blue (BL), Black (BLK), Grey (GR) or Red-Blue (COL)

SMALL PARTS STORAGE

LOUVRE PANELS & LINBIN STORAGE SOLUTION

What you need to know

- Each LINBIN size will require a certain amount of space on a louvre panel. This is called the LINBIN Unit (LBU).
- The number of LINBINS each panel can accommodate is called the LINBIN Unit Capacity (LBUC).
- Adding together the LINBIN Unit values, should match the LINBIN Unit Capacity, to utilise the full space available.

Example

On a louvre panel with a LBUC of 16 (Code: VLP1) you can fit:

8 Size 2 or Size 3 LINBINS as they have an LBU of 1 = 8 LBU

2 Size 6 LINBINS as they have an LBU of 4 = 8 LBU

Example: VLP 1 Panel = total 16 LBUC:

4 x Size 2 (total 4 LBU)
4 X Size 3 (total 4 LBU)
2 x Size 6 (total 8 LBU)
8 x LBU 1 = 8
2 x LBU 4 = 8
Total LBU 16

LINBINS™

Wall mounted louvre panels provide a valuable and versatile storage unit.

Fixing holes are positioned so they can be interlinked, for a continuous run. They are often used for bench ends, sides of desks and even backs of doors.

- Made from pressed steel for durability
- Epoxy powder coated paint gives a smart appearance
- Suitable for walls, desks, workbenches and doors

WLS2	300mm	10kg	16mm square	£3.61
WLS1	150mm	5kg	16mm square	£2.28

SMALL PARTS STORAGE

MOBILE LOUVRE PANEL UNITS

Move and position small parts and components.
Ideal for workshops and garages

Easy to use for

- Moving stock to and from production lines
- Mobile picking areas
- Additional capacity alongside a workbench
- Temporary storage locations

Essential product details

- Freestanding for ease and flexibility of use
- Strong and durable all steel panel and base
- Epoxy powder coated finished with grey panels and blue stands
- Comes with 2 braked castors as standard
- Available as a double sided unit
- Different number of LINBIN combinations of size and colour

A heavy duty framed trolley completed with 2 braked rubber castors as standard.

ESD PROTECTED SMALL PARTS STORAGE

While we move and work, we continuously generate static electricity. If we touch a conductive object while being electrically charged, we cause the charge to be discharged into the object, creating an "electric shock". This phenomenon is known as an ESD (Electro Static Discharge). If this is discharged into component boards or device connectors, it can cause damage and reduced product reliability. Maintaining an unbroken protective ESD protective chain, is essential to product quality, so ESD protected small parts storage is vital.

For safely transporting or storing electronic components that are prone to damage caused by electrostatic discharge (ESD)

EURO PICKING CONTAINERS

These innovative open end stackable euro sized containers, allows you to pick, even when they are stacked.

Available as fully open, or with doors, these containers can be transported around the working environment with the use of a dolly.

See below for ready made kits, with open ended containers, or with drop down clear doors for ease of visibility. Also a dolly for easy mobility when needed.

If transport of product is not key, then simply make up a picking wall to suit your requirement.

For stand-alone stacking or use in shelving/racking bays

STORAGE CONTAINERS

STACK & NEST CONTAINERS

A wide range of containers for use throughout the workplace.

Stack & Nest containers are used throughout the grocery supply chains. The nesting and ventilated containers are ideal for transporting food. They are easily cleaned and allow for accurate temperature control.

Our Lidded and Everyday containers are used throughout commercial, industrial and domestic environments, offering versatile storage in numerous situations.

Stackable, robust and re-usable, so there are cost savings in transport. Helps reduce carbon footprint.

SOLID STACK & NEST CONTAINERS

Ideal for use in demanding environments, 180 degree stack-nest containers are strong & tough. Bi-colour models clearly identify stacking & nesting positions, to prevent accidentally crushing contents by stacking in the wrong orientation.

- Used in high throughput distribution areas where colour distinction helps speed up the process
- Handles incorporated into design of box
- Strong and durable design that is built to last

STORAGE CONTAINERS

PALLETS

DOLLIES & PLASTIC PALLETS

Need to move those containers or goods around? We have a selection of options from the standard dolly, to the dolly/pallet hybrid. Useful in areas where from time to time, you need to move products of up to 500kg and you do not want to keep a pump truck.

Our range also includes plastic pallets and pallet boxes. Offering an easy to clean, rust free solution for palletised products.

Designed to easily move large stacks of Euro boxes or Euro containers

MAXIMUM LOAD
180kg

STANDARD DOLLY

Red standard dolly carries 600 x 400 Euro Stacking, ALC, Maxinest & Solid Stack & Nest containers.

- Easily transport your containers
- 4 Swivel Nylon castors 100mm diameter

ONLY
£53.84

Code	Height	Width	Depth	Capacity	Each

DOLLY/PALLET HYBRID

The Pally is a Half Euro sized plastic pallet that, with the push of a single pedal, transforms into a dolly system on wheels. The Pally has a weight capacity of up to 500kg, with two fixed castors and two swivel castors to give it optimum manoeuvrability.

- Eliminates the need for pump truck and forklift usage line side, which saves time and increases health and safety
- Ideal replacement for roll cages, when used as a system with the Attached Lid Containers and Half Euro Lid
- Same usable footprint as a roll cage, eliminating the metal sides, so you can fit an extra row on a truck

VERSO WORKBENCHES

Bott Verso workbenches are robust and versatile, with high load capacities and varied storage options, for assembly and lightweight industrial use.

Framework and Cantilever benches feature adjustable leg heights, to suit individual requirements.

Robust construction

Multiple worktop options available

Multiplex (MPX) Worktop
Resin bonded layered beech ply, with cross laminated construction. A tough general duty worktop, suitable for most applications.

Lino worktop
Lino faced worktop. An easy to clean worktop with good surface resistance to water, oils and chemicals.

MFC worktop
Particle board core, with a light grey laminate face. A light duty, easy to clean top for assembly or office environments.

RAL7035
Frame colour

LOAD

TELESCOPIC LADDERS

Ideal for surveyors, tradesmen and for DIY use. These top of the range telescopic ladders are light to carry, compact to store, easy to transport and will easily fit into the boot of a car. Complete with anti-pinch system, which safely protects hands when collapsing the ladder, and rounded rubber feet to ensure ease of transition, from vertical to leaning position.

- Smooth operation, extends & locks rung by rung
- Anti-pinch Finger Protectors
- Class EN131

SACK TRUCKS & DRUM HANDLING

Sack Trucks are very useful in all sorts of environments. There are two different handle types: standard and 'p' handle. Standard handles comprise a 2 handle frame design.

The 'P' handle uses a loop, which allows the truck to be transported with one hand. This can become quite useful when you need to be manoeuvring in tight spaces.

ONLY
£36.95

Move items easily & safely around the workplace

LOAD 150kg

ECONOMY SACK TRUCKS

This sack truck features a strong tubular steel construction, with quality welded joints, able to hold 150kg load. The solid wheel hand truck features steel wheel inserts, for added strength and durability. This truck also comes fitted with very comfortable rubber hand grips as standard.

- Strong Tubular Steel Construction
- Rest on handles for flat loading. Heavy Duty Solid Wheels.

Delivering the right pallet racking solution for your business

All pallet racking systems need to be designed to accommodate the type of handling equipment used and the load capacity required.

We can work with you and advise you every step of the way to ensure you have the pallet racking solution you require.

We will help you select the right type of racking dependent on the following considerations:-

- The type of goods you store
- The amount of floor space available for the racking installation
- The speed of throughput
- The type of handling equipment used

We understand that each client comes with different requirements and this is why we work closely with you to design the system that works best for you and provides you with optimum storage that is both manageable and cost-effective.

We are on hand to be able to advise you on the best type of pallet racking to meet your needs based on your individual business model and the existing handling equipment and facilities you have.

Pages 50 - 54

PALLET TRUCKS

Pallet trucks are used to move goods, with or without pallets. It is mainly used in warehouses or in locations where goods are loaded and unloaded. This range of pallet trucks offers you an efficient way to lift and stack your goods without straining your body too much.

STANDARD PALLET TRUCKS

This standard hand pallet truck is ideal for everyday use. Its fork size is the most popular and universal. The width across the forks of the pallet truck and the fork length, allow it to handle Euro pallets, as well as UK (GKN/CHEP) pallets. The pallet truck's hydraulic pump unit is fitted with an overload protection valve.

- Fingertip operated controlled lowering valve
- Tapered forks
- Nylon steering wheels and single nylon load rollers

Code	Fork Length	Fork Width	Lift Height	Each

MINI PALLET TRUCKS

The mini pallet truck is designed for light, to medium use. Its compact size and low weight allows it to be easily transported. This mini hand pallet truck also has a lowered height of only 60mm, making it ideal for small low profile pallets. The forks are designed to work with most printer's pallets and other small pallets. Weighs just 35KG.

- Load capacity: 500kg
- 3 position control lever
- Low profile forks

Move all your pallets with one pallet truck

ADJUSTABLE PALLET TRUCKS

This Adjustable Pallet Truck is designed with adjustable forks, which enables you to move all your pallets with one pallet truck, instead of two or even three. It is ideal for applications where more than one type of pallet is used. This pallet truck is also great for special sized pallets, as the forks can be fixed in any position within the width range.

- Hand Pallet truck with adjustable width over forks, allows handling of different sized pallets with one machine
- High quality hydraulic pump with controlled lowering
- Width over forks is adjustable, either from 400 to 520mm (ideal for the printing industry for example) or from 530 to 680mm (for general warehouse and transportation use).

HIGH LIFT PALLET TRUCKS

The high lift pallet truck is designed to eliminate repetitive back strain, when loading or offloading pallets by hand. The high lift pallet truck has a scissor action that lifts pallets to a working height of 800mm. Our high lift pallet trucks conform to the latest applicable health and safety regulations.

- Help prevent back strain and injury
- Automatically braked when forks raised above approx. 300mm/400mm
- 1000/1500kg capacity

SAFETY NETTING SOLUTIONS

A range of innovative safety netting solutions – the modern and improved resolution to a safer working environment for your staff and reduction in damage to stock and infrastructure.

RACKNETS™ – BACK-OF-RACK NETTING SOLUTION

The potential for a pallet to fall out of racking is increased when a pallet support system such as mesh/timber decks and pallet supports are used. RackNets™, the first comprehensive bespoke netting solution, offers the best risk reduction system available on the market today. Discover the RackNets™ range – the modern alternative to Anti-Collapse Steel Mesh at the back of racks.

- **RackNets™ 2.3** – Offers warehouse users an effective alternative to traditional steel mesh solutions, installed to contain stock (up to 50kg) falling from the rear of APR.
- **RackNets™ 3.0** – Offers warehouse users flexible and robust risk reduction for objects including pallets up to 1000kg falling from Pallet Racking.
- **RackNets™ 5.0** – Offering the same design features as RackNets 2.3 and 3.0, RackNets™ 5.0 has been developed for applications where an enhanced level of protection is required.
- **RackNets™ In-Flue Netting** – In many warehouses there is a significant risk of stock or loaded pallets being pushed through from one aisle into an adjacent aisle. RackNets™ In-Flue nets can be specified as 2.3, 3.0 and 5.0 systems, depending on the application and level of risk.

Need a specific solution?

Call to discuss your project

BESPOKE NETTING SOLUTIONS

Bespoke safety netting solutions are designed and manufactured to meet all your safety requirements – ensuring you are getting the right safety solution at the best price.

We are able to offer a variety of net solutions, including:

- Bespoke Conveyor Catch Net systems - prevent product falling from conveyors
- onto pedestrians.
- Warehouse Divider Nets - prevent stock falling into walkways onto pedestrians.

10m EASY-FIT PACKAGE ONLY
£99.95

MEZZNETS™

MezzNets™ mezzanine floor safety netting creates a barrier between the edge of the mezzanine and the ground below, preventing stock falling between the railings and potentially injuring employees.

MezzNets™ are made from high-tenacity polypropylene which is lightweight, incredibly strong and almost impossible to damage during normal operation. They require no special tools to fit and can be affixed to new installations or retro-fitted.

Benefits:

- Creates a safer working environment for your staff and helps protect stock
- 2.3mm high-tenacity and durable polypropylene stitched cord – other grades of net available on request
- Removable and cleanable
- Choice of either blue or black netting

WIDE RANGE OF OPTIONS
TAPES ARE AVAILABLE IN A RANGE OF COLOURS AND WIDTHS

EASY WIPE WET WIPE MARKER PENS

Our black Marker Pen is unlike most marker pens due to its unique Wet Wipe quality. Most pens of this type are either permanent or wipe off, whereas this ink, once dried, needs a damp cloth for it to be removed. Using permanent ink removes the benefit of having reusable label and using a pen with removable ink means that the text can be removed by accident by someone touching the label as they pass.

ONLY
£20.40

Code	Colour	Quantity	Each
PB/10	Black	10	£20.40

MAGNETIC SELF-ADHESIVE STRIPS

Magnetic strip is supplied in four widths, each backed with a strong permanent self-adhesive for mounting items onto steel surfaces.

This magnetic strip is ideal for many jobs in the factory or warehouse, eliminating the need for drilling or other methods of fixing.

- Locates on any steel surface
- Eliminate the need for drilling
- Foam adhesive is perfect for slightly uneven surfaces

FROM ONLY
£35.40

Code	Type	Width	Length	Finish	Each

WAREHOUSE SAFETY SIGNS

A warehouse can be one of the most hazardous working environments around, with a potentially lethal blend of moving plant, heavy items and staff, all sharing the same space.

Safety signs have a vital role to play in communicating safety information to minimise the risk of an accident occurring and can relay across a clear message that is universally understood.

Safety signs can be drilled for permanent application.

Make sure your warehouse remains on the right side of the HSE regulations with the right health and safety signs

WAREHOUSE SAFETY SIGNAGE

Health and safety is an issue that is impossible to ignore and while it seems you can hardly go anywhere without seeing a sign of some sort.

- To make your warehouse or any place of work safer, we offer many site safety signs. Some relate to specific machinery, such as forklifts, while others offer security or safety advice.
- Can be drilled for permanent application

Delivering the right pallet racking solution for your business

All pallet racking systems need to be designed to accommodate the type of handling equipment used and the load capacity required.

We can work with you and advise you every step of the way to ensure you have the pallet racking solution you require.

We will help you select the right type of racking dependent on the following considerations:-

- The type of goods you store
- The amount of floor space available for the racking installation
- The speed of throughput
- The type of handling equipment used

We understand that each client comes with different requirements and this is why we work closely with you to design the system that works best for you and provides you with optimum storage that is both manageable and cost-effective.

We are on hand to be able to advise you on the best type of pallet racking to meet your needs based on your individual business model and the existing handling equipment and facilities you have.

Please note: signage kits attached to all the bins is an optional extra

RECYCLING RACKSACKS

The Racksack is designed for most racking and shelving systems between 900mm and 1100mm. The Racksack has been thoughtfully developed so that it will not intrude into valuable warehouse space. When hung it has a large open mouth to easily receive waste, yet its tapered design enables it to hardly encroach into the floor area.

- Three strong handles are woven into the edge of the sack, one on each side for carrying and one on the base, so that the sack can be easily tilted from the base and emptied
- Can be hung over or hooked onto any substrate
- Made from tough waterproof polyester

RACK SACK FROM ONLY
£24.01

Code	Type	Quantity	Height	Width	Capacity	Each
RSB1	Blue	1	1000mm	920mm	160L	£24.01

RECYCLING TROLLEY SACKS

Keep your picking area clean and tidy as you go by fitting these recycling sacks to the trolley. Not only do you keep unwanted waste materials off the floor but you also help segregate waste. Made from tough waterproof polyester, these single or double pocket trolley sacks can adequately withstand rigorous industrial environments.

- Ideal for hooking onto handles of picking trolleys up to 580mm wide or can be secured via eyelets in other locations
- Double Pocket Sack: Upper pocket - H600mm x W600mm
- Lower pocket - H500mm x W600mm

SITE SAFETY

These products offer a range of solutions for warehouse management and safety, such as convex mirrors that help reduce traffic accidents and security incidents by offering clear viewpoints where vision is restricted.

Storage cages are great for securely storing many types of items, ranging from cast cylinders, oil drums to general warehouse equipment. As part of the health and safety regulations, it is a requirement for employers to provide a First Aid kit within a place of work. We have a comprehensive HSE compliant range available to ensure that you meet the required regulations.

Fast Delivery

MIRRORS FROM ONLY **£53.55**

SAFETY & SECURITY MIRRORS

Convex mirrors are used indoors in offices, shops, libraries, schools and warehouse, and outdoors as traffic mirrors at concealed driveways and yards. Convex mirrors enable greater vision of blind spots and concealed areas.

- Act an anti-theft deterrent in shops to reduce the risk of shoplifting
- Shatter resistant acrylic face with a protective vinyl edging

SAFETY FOOTWEAR

TRACERLITE

Tracerlite industrial boots are designed specifically for safety, speed and agility whilst still maintaining premium comfort.

Tracerlite puts a huge emphasis on using lightweight materials throughout the build of the shoe. The Full Grain Leather and Midsole components are among the lightest on the market.

All boots feature slip resistant soles and have an antibacterial cushioning pad in the forefoot and heel to provide all day comfort.

PREMIUM quality , high performance, safety footwear

ONLY **£97.99**

Delivering quality changing rooms and personal storage solutions

We are here to help you with experienced personnel, specialist designers and professional fitters. We're with you from the initial briefing and site survey, through detailed design proposals, to manufacture, installation and final commissioning. Your project is managed flexibly and sympathetically, and you're always part of the process. This is space which must work for you, not the other way round. The result? You get the facility you need, when you need it, where it's required. We have experience in providing solutions for many market sectors including:

- Warehouses
- Manufacturing
- Education
- Health and Sports Clubs
- Healthcare
- Hotels

PROJECTS & SITE VISITS

THE STORAGE DESIGN Catalogue

Sometimes you want a little more.

We are happy to support you on larger projects where you are looking for a more tailored solution to meet your needs.

We have a dedicated and experienced team who will be happy to visit you and work along side you.

Please contact
Peter Bird for Project Sales at
peter@storage-design.co.uk

CONDITIONS OF SALE

PRICING AND PRODUCT DETAIL

Pricing is accurate (errors and omissions accepted) at the point of publication. Whilst we work hard to maintain the prices shown in the catalogue, we note that from time-to-time it will be necessary to make price amendments. We will inform you of such changes prior to despatching products.

DELIVERY TERMS

Any associated charges for delivery are noted on the inside cover of our catalogue, or on our website.

We work hard to ensure that we meet delivery times. However, please note that our delivery times are an estimate and we are not liable for delivery delays of catalogue products (we note that larger projects will have terms and conditions that supersede those outlined here).

Delivery will be made to the ground floor of any building, or an appropriate loading bay. Any other delivery arrangements need to be agreed at the point of order and may carry additional charges.

SHORTAGES AND DAMAGES

Responsibility for the above will not be accepted, once the goods have been signed for. In the unlikely event that the products are damaged at point of delivery, we request you do not accept the delivery and make it very clear on the carrier's paperwork, the reason why the product has been refused, is as a result of product damage. If a shortage is found to be in a sealed carton, we request the shortage is reported within 24 hours.

PRODUCT MADE TO ORDER

Some products are made to order and are therefore not returnable. Please check if you want to confirm whether this applies to your order.

RETURN OF GOODS

Goods will only be accepted for return, with prior agreement with the seller, within 7 working days of delivery. Products must be returned, complete with packaging and be in a re-saleable state. A handling charge will be imposed. This will normally be 25% of the sell price. This excludes the carriage charge to return the goods.

VAT

This is not included in prices shown in the catalogue.

RESERVATION OF TITLE

The title of the Goods will not pass to the buyer, until the buyer has paid for the products in full.

COPYRIGHT

Except when supplied by third parties, the copyright of all images, text and graphics in this catalogue are protected by law. Any reproduction should not be undertaken without written permission.

ERRORS AND OMISSIONS

We do not accept liability for any errors or omissions and reserve the right to change information, specifications and descriptions of listed goods, products and services.
