Spur rolled edge shelving has been available in many forms over the years and remains a very popular, cost effective solution in a multitude of storage environments. Originally designed for document management applications, the system is widely used in retail, industrial, museums and many other applications.

Like all Spur brand products, quality is the key to success and only the highest quality materials are used in our manufacturing process. We source all our steel in the UK, use ultra-low bake powder coating technology and CCL free electricity, making this some of the most environmentally friendly shelving available.

# SPUR<sup>®</sup> ROLLED EDGE EDGE

Spur Rolled Edge has a narrow frame profile which helps maximise the capacity of any shelving installation. Shelves are adjustable on a 1" pitch to be compatible with many existing installations including Spur Adjustable Angle Shelving. Indeed the two systems can be combined with in the same run enabling even more efficient use of space.

For strength shelves may be bolted, or clipped into place. Bolts are also used where it is important that shelves cannot be removed; schools being just one example. Clips on the other hand enable easy adjustment and this is ideal in applications where the items change with the seasons.

To gain even greater space utilisation Spur Rolled Edge can be mounted on mobile shelving bases with manual or powered drives. Whatever the application Spur is a name that has been trusted for many decades for both quality and value.

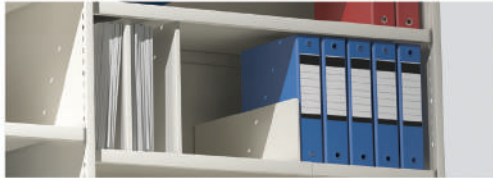

## SPUR ROLLED EDGE SYSTEM

- Spur quality trusted for decades
- Designed to meet your requirements
- Retail to Industrial
- Bespoke enhancements
- Effective space utilisation
- Galvanised and powder coated finishes

# THE SYSTEM

Full & part height dividers

Filing

Storing open-fronted containers

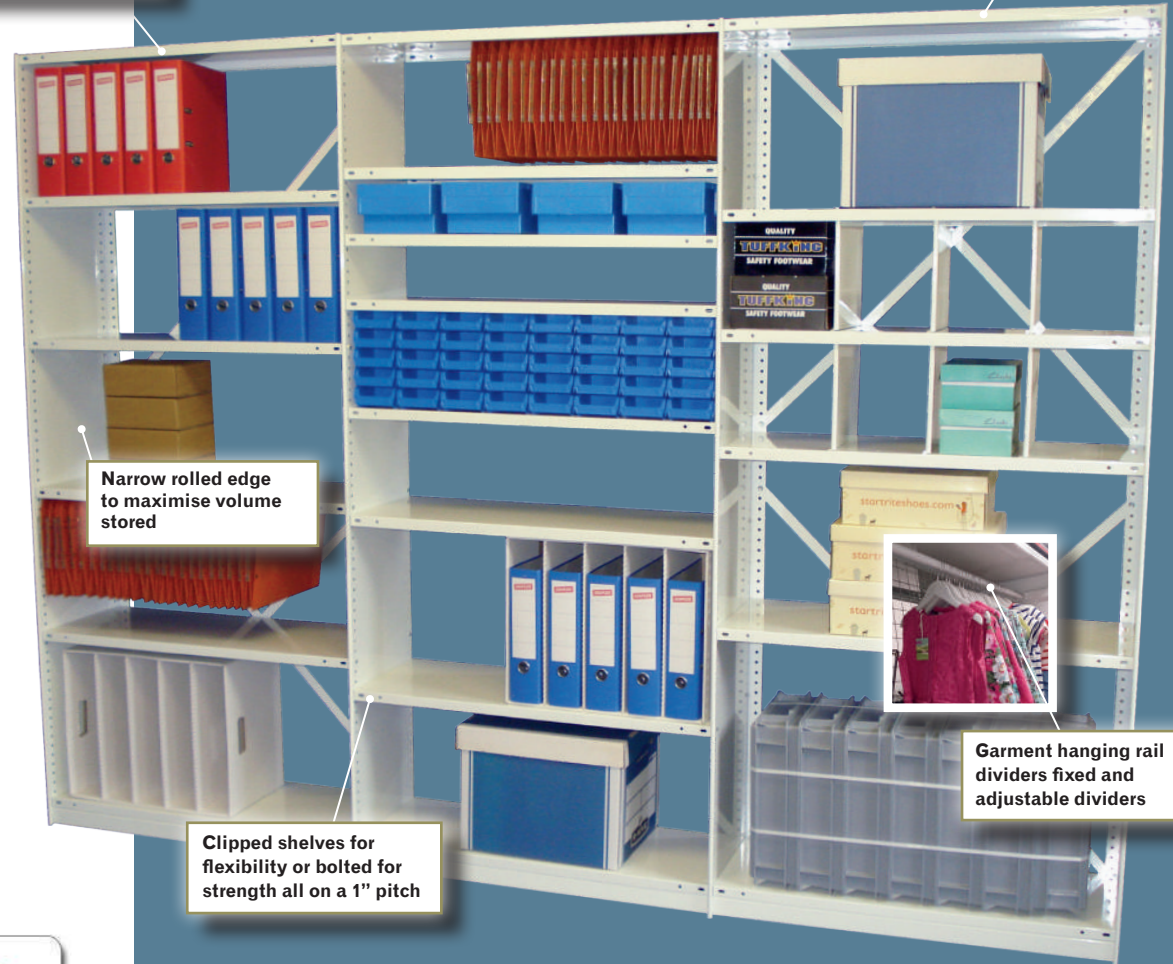

Pigeon Hole units

Safe edges to uprights and shelf fronts

Galvanised white, black or standard office grey. Bespoke colours available

Narrow rolled edge to maximise volume stored

Clipped shelves for flexibility or bolted for strength all on a 1" pitch

Garment hanging rail dividers fixed and adjustable
